

# **Exploring High-MuB Matter with Rare Probes**

Monday 11 October 2021 - Friday 15 October 2021

ECT\* - Trento

## **Book of Abstracts**

# Contents

Welcome . . . . .	1
Organization of the week . . . . .	1
The phase diagram at finite T and $\mu_B$ . . . . .	1
HADES overview . . . . .	1
CMB overview . . . . .	1
NA61 overview . . . . .	1
J-PARC-HI overview . . . . .	1
Exploring the QCD phase diagram with Taylor expansion and analytic expansion . . . . .	2
NA60+ overview . . . . .	2
NICA/MPD overview . . . . .	2
STAR-BES overview . . . . .	2
BES theory and the QCD critical point . . . . .	2
Informal discussions . . . . .	2
Theory overview on dileptons . . . . .	3
Review of experimental results on dileptons . . . . .	3
Review of experimental results on real photons . . . . .	3
Chiral restoration at high $\mu_B$ . . . . .	3
MPD: results and prospects on dilepton measurements . . . . .	3
QCD phase transition in dynamical models at high $\mu_B$ at SPS energy and below . . . . .	3
STAR-BES: dilepton results and prospects . . . . .	3
Electromagnetic spectral functions and charm diffusion . . . . .	4
Dilepton production at low SPS energy . . . . .	4
Dilepton production in the PHSD/PHQMD approach . . . . .	4

Theory overview on open HF . . . . .	4
Review of experimental results on open HF production . . . . .	4
Traces of nonequilibrium effects in the charm observables and quarkonia? . . . . .	4
Prospects for open charm and strangeness measurements in NA60+ . . . . .	5
Heavy quark statistical hadronization in high-energy pp collisions . . . . .	5
Charm and strangeness production in the statistical hadronization model . . . . .	5
Open charm studies in NA61/SHINE . . . . .	5
Signatures of Moat Regimes at high density . . . . .	5
Results on electromagnetic form factors . . . . .	5
Theory overview on quarkonium . . . . .	6
Quarkonium kinetics in hadronic matter . . . . .	6
Current and future measurements of quarkonia and open HF in fixed target mode at the LHC . . . . .	6
Elements of quantum dissociation of quarkonia . . . . .	6
Quarkonium production at low SPS energy in the comover approach . . . . .	6
Quarkonium transport at SPS energy and below . . . . .	6
Quarkonium production in pp and pPb collisions at low SPS energy . . . . .	7
An effective field theory at finite chemical potential . . . . .	7
Summary/wrap up . . . . .	7
Summary/wrap up 2 (heavy flavours) . . . . .	7
Discussion on the preparation of a document/review to be published . . . . .	7
Review of experimental results on quarkonium production . . . . .	7

1

## **Welcome**

**Corresponding Author:** g.aarts@swansea.ac.uk

2

## **Organization of the week**

3

## **The phase diagram at finite T and $\mu_B$**

**Corresponding Author:** massimo@lngs.infn.it

4

## **HADES overview**

**Corresponding Author:** s.harabasz@gsi.de

5

## **CMB overview**

**Corresponding Author:** blume@ikf.uni-frankfurt.de

6

## **NA61 overview**

**Corresponding Author:** marek.gazdzicki@cern.ch

7

## **J-PARC-HI overview**

**Corresponding Author:** ozawa@post.kek.jp

8

## **Exploring the QCD phase diagram with Taylor expansion and analytic expansion**

**Corresponding Author:** schmidt@physik.uni-bielefeld.de

9

## **NA60+ overview**

**Corresponding Author:** alessandro.de.falco@ca.infn.it

10

## **NICA/MPD overview**

**Corresponding Author:** itzhak.tserruya@weizmann.ac.il

11

## **STAR-BES overview**

**Corresponding Author:** geurts@rice.edu

12

## **BES theory and the QCD critical point**

**Corresponding Author:** vkoch@lbl.gov

13

## **Informal discussions**

14

## **Theory overview on dileptons**

**Corresponding Author:** arno.tripolt@gmail.com

15

## **Review of experimental results on dileptons**

**Corresponding Author:** j.stroth@gsi.de

16

## **Review of experimental results on real photons**

**Corresponding Author:** axel.drees@stonybrook.edu

17

## **Chiral restoration at high $\mu_B$**

**Corresponding Author:** chihiro.sasaki@uwr.edu.pl

18

## **MPD: results and prospects on dilepton measurements**

**Corresponding Author:** sudhir@jinr.ru

19

## **QCD phase transition in dynamical models at high $\mu_B$ at SPS energy and below**

**Corresponding Author:** steinheimer@fias.uni-frankfurt.de

20

## **STAR-BES: dilepton results and prospects**

**Corresponding Author:** ruan@bnl.gov

21

## **Electromagnetic spectral functions and charm diffusion**

**Corresponding Author:** okacz@physik.uni-bielefeld.de

22

## **Dilepton production at low SPS energy**

**Corresponding Author:** hees@itp.uni-frankfurt.de

23

## **Dilepton production in the PHSD/PHQMD approach**

**Corresponding Author:** e.bratkovskaya@gsi.de

24

## **Theory overview on open HF**

**Corresponding Author:** santosh@iitgoa.ac.in

25

## **Review of experimental results on open HF production**

**Corresponding Author:** xdong@lbl.gov

26

## **Traces of nonequilibrium effects in the charm observables and quarkonia?**

**Corresponding Author:** t.song@gsi.de

27

## **Prospects for open charm and strangeness measurements in NA60+**

**Corresponding Author:** prino@to.infn.it

28

## **Heavy quark statistical hadronization in high-energy pp collisions**

**Corresponding Author:** minhephys@gmail.com

29

## **Charm and strangeness production in the statistical hadronization model**

**Corresponding Author:** andronic@uni-muenster.de

30

## **Open charm studies in NA61/SHINE**

**Corresponding Author:** pawel\_piotr.staszal@uj.edu.pl

31

## **Signatures of Moat Regimes at high density**

**Corresponding Author:** rob.pisarski@gmail.com

32

## **Results on electromagnetic form factors**

**Corresponding Author:** piotr.salabura@uj.edu.pl

33

### **Theory overview on quarkonium**

**Corresponding Author:** baoyi.chen@tju.edu.cn

34

### **Quarkonium kinetics in hadronic matter**

**Corresponding Author:** david.blaschke@gmail.com

35

### **Current and future measurements of quarkonia and open HF in fixed target mode at the LHC**

**Corresponding Author:** mwinn@cern.ch

36

### **Elements of quantum dissociation of quarkonia**

**Corresponding Author:** mstrick6@kent.edu

37

### **Quarkonium production at low SPS energy in the comover approach**

**Corresponding Author:** elena@fpaxp1.usc.es

38

### **Quarkonium transport at SPS energy and below**

**Corresponding Author:** xiaojiandu.physics@gmail.com

39

## **Quarkonium production in pp and pPb collisions at low SPS energy**

**Corresponding Author:** rlvogt@lbl.gov

40

## **An effective field theory at finite chemical potential**

**Corresponding Author:** sourendu.gupta@gmail.com

41

## **Summary/wrap up**

42

## **Summary/wrap up 2 (heavy flavours)**

43

## **Discussion on the preparation of a document/review to be published**

44

## **Review of experimental results on quarkonium production**
