

WORKSHOP

Short-distance nuclear structure and PDFs

Trento, 17-21 July 2023

ORGANIZERS

Nadia Fomin (University of Tennessee, US)

John Arrington (LBNL, US)

Noeimi Rocco (Fermi National Laboratory, I)

Raphaël Dupré (IJCLab - CNRS - Univ. Paris-Saclay, F)

MAIN TOPICS

Short-range correlations (SRCs): A-dependence, isospin dependence, momentum dependence, nuclear structure calculations, reaction mechanisms, isolating 3N-SRCs.

EMC effect - new data, viable explanations, new observables including spin-dependent, momentum-dependent, and flavor-dependent modification, as well as modification of anti-quarks.

EMC-SRC correlation - what can we learn about EMC effect from SRCs and vice-versa? Data on many new nuclei will help significantly flesh out this landscape.
