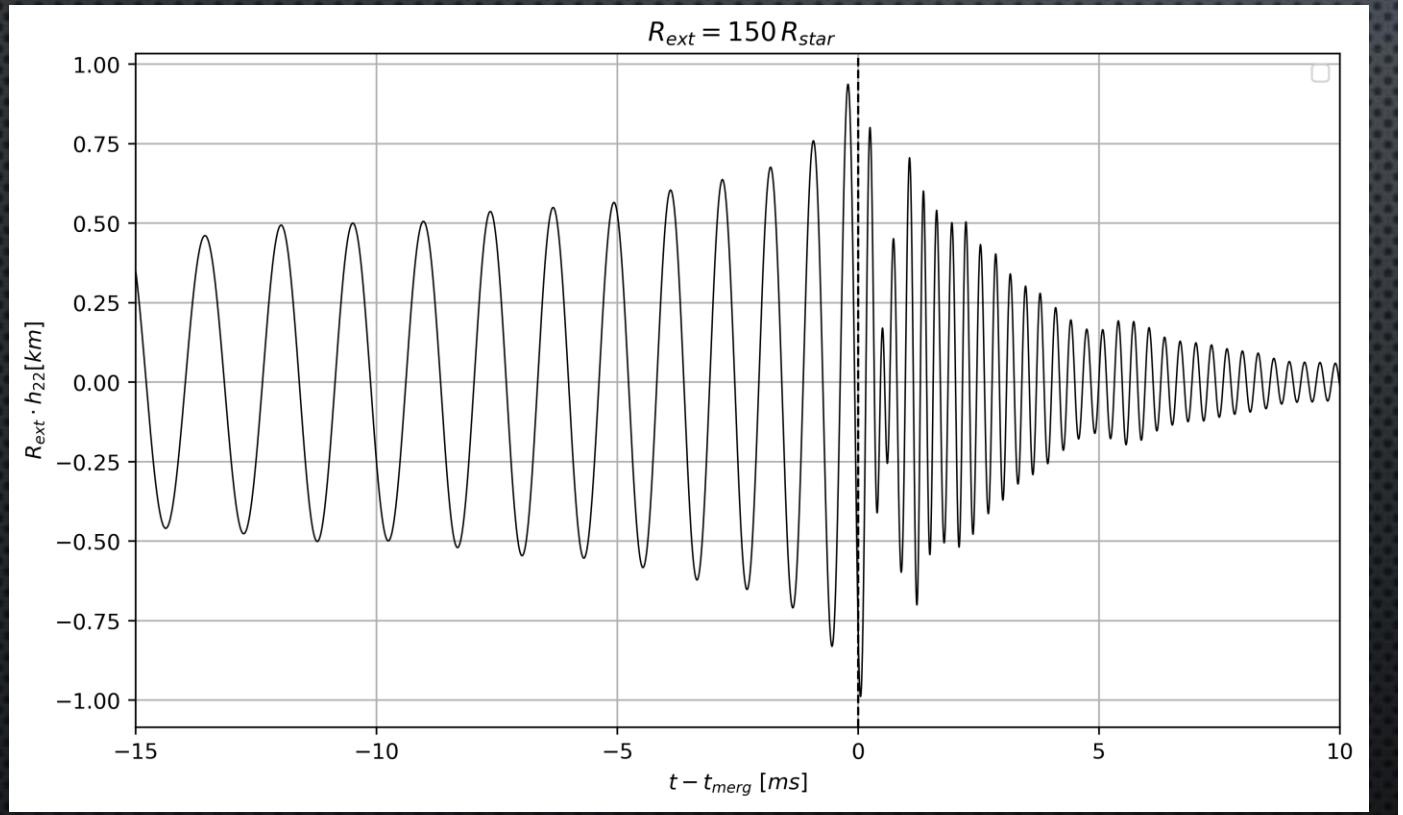
Gravitational Wave



Fourier Transformation of Gravitational Wave

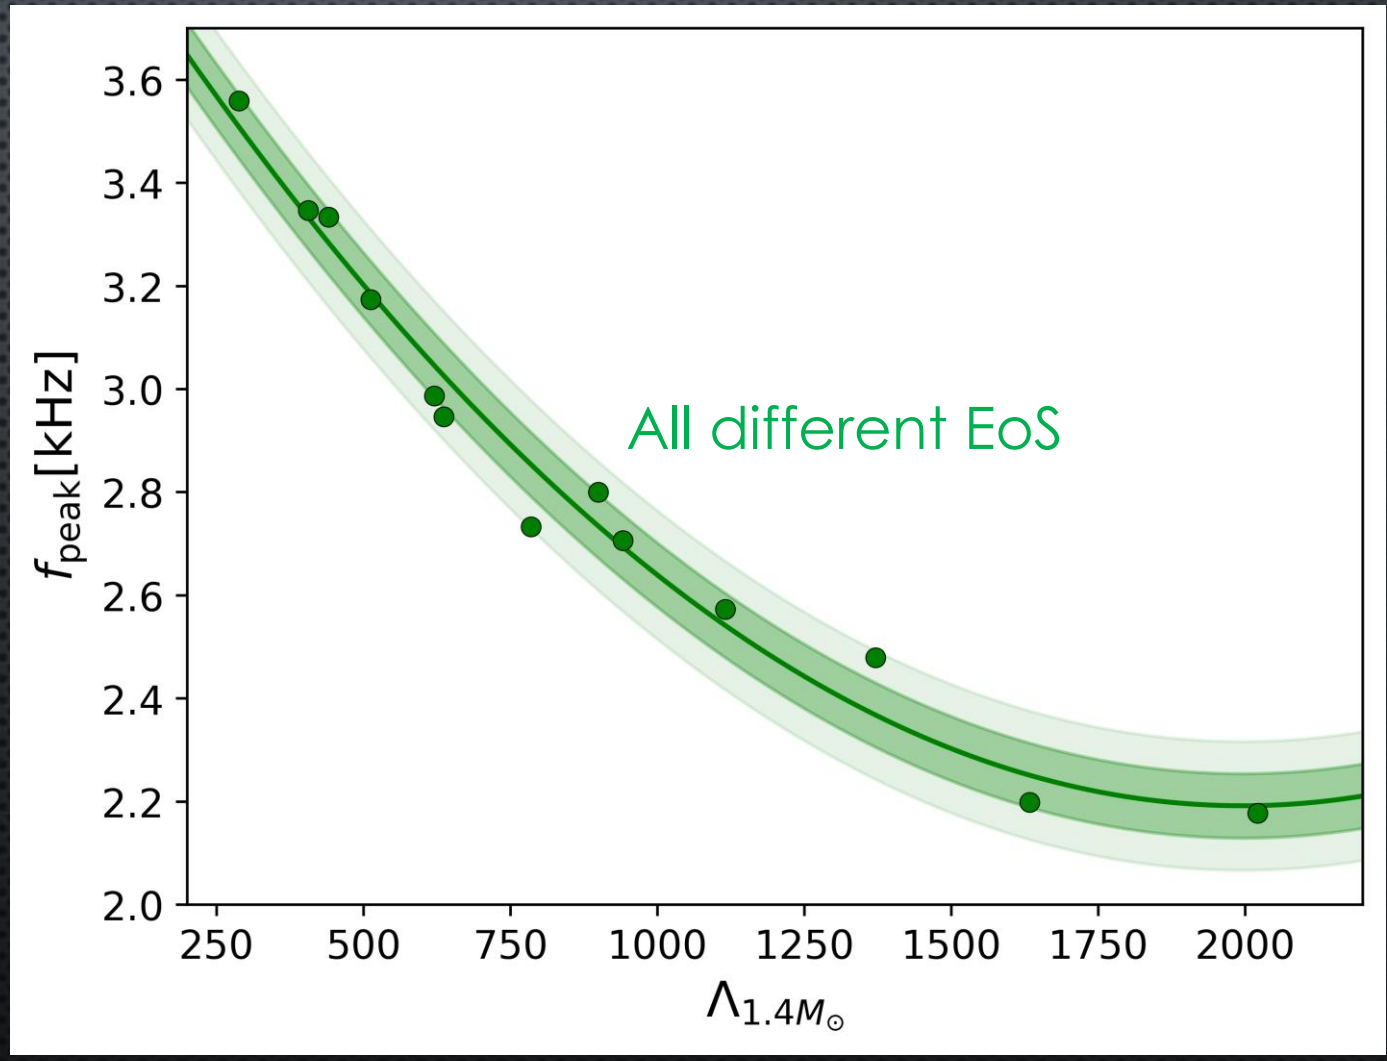
QUASI-UNIVERSAL RELATION

- EoS - Independent (Almost)
- Observable Variables



NUMERICAL SIMULATION OF BNS MERGER

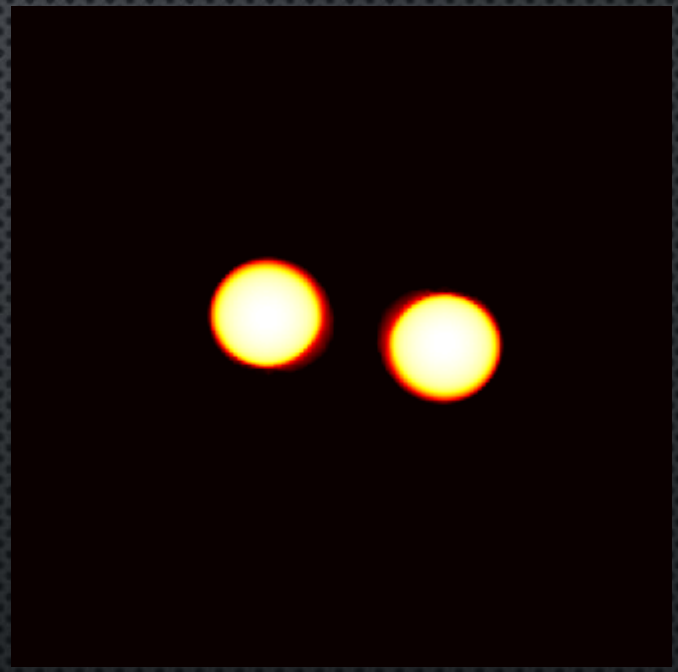
CODE FOR GENERAL RELATIVISTIC HYDRODYNAMIC SIMULATION:

EINSTEIN TOOLKIT

WWW.EINSTEINTOOLKIT.ORG

Equation of State (EoS):

- Tabulated
- Piecewise Polytrope (Approximation)



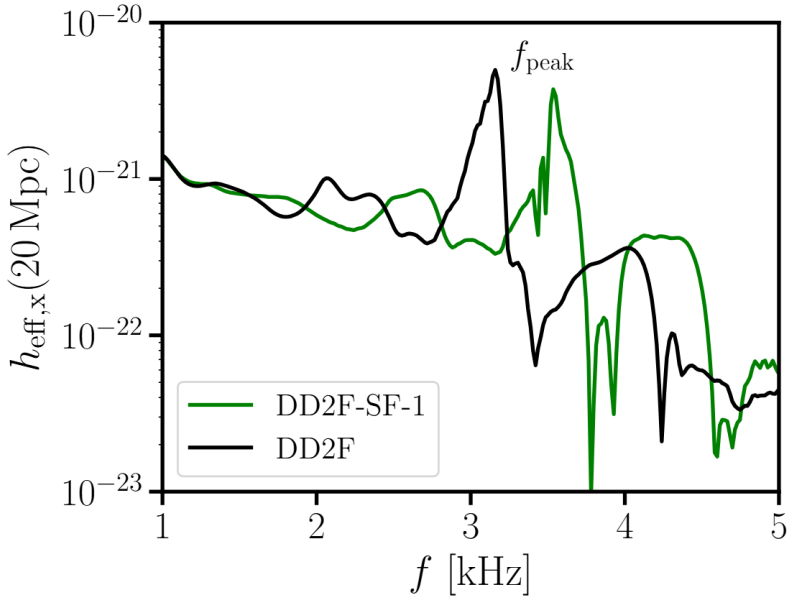
G.Rivieccio et al. 2024

Equation of State (?)

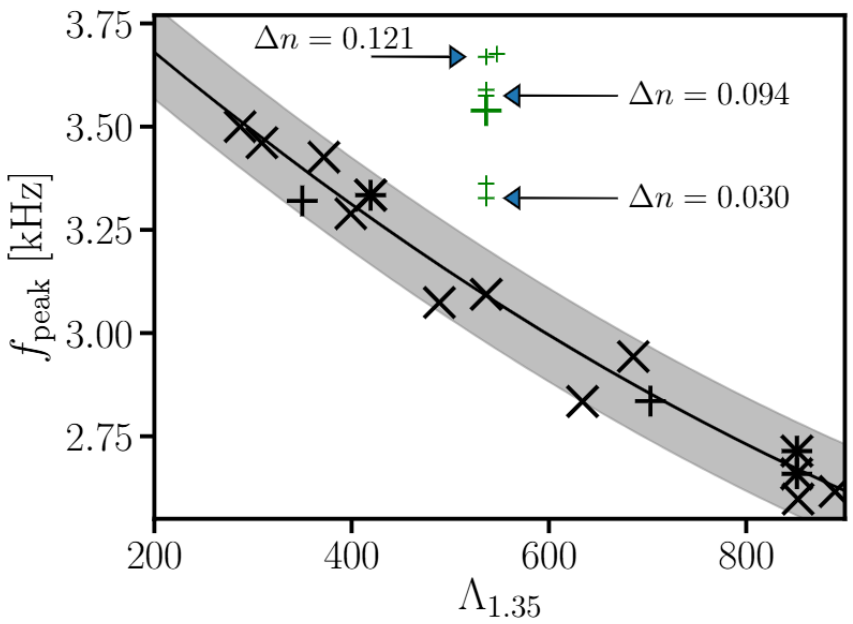
EOS: PHASE TRANSITIONS (PT)

- First order PT to Deconfined Quark Matter (DQM)

Fourier Transformation of Gravitational Wave



Universal Relation: Tidal deformability vs Freq. peak



First order PT to DQM

Nucleonic EoS

Bauswein et al. 2019 Phys. Rev. Lett. **122**, 061102

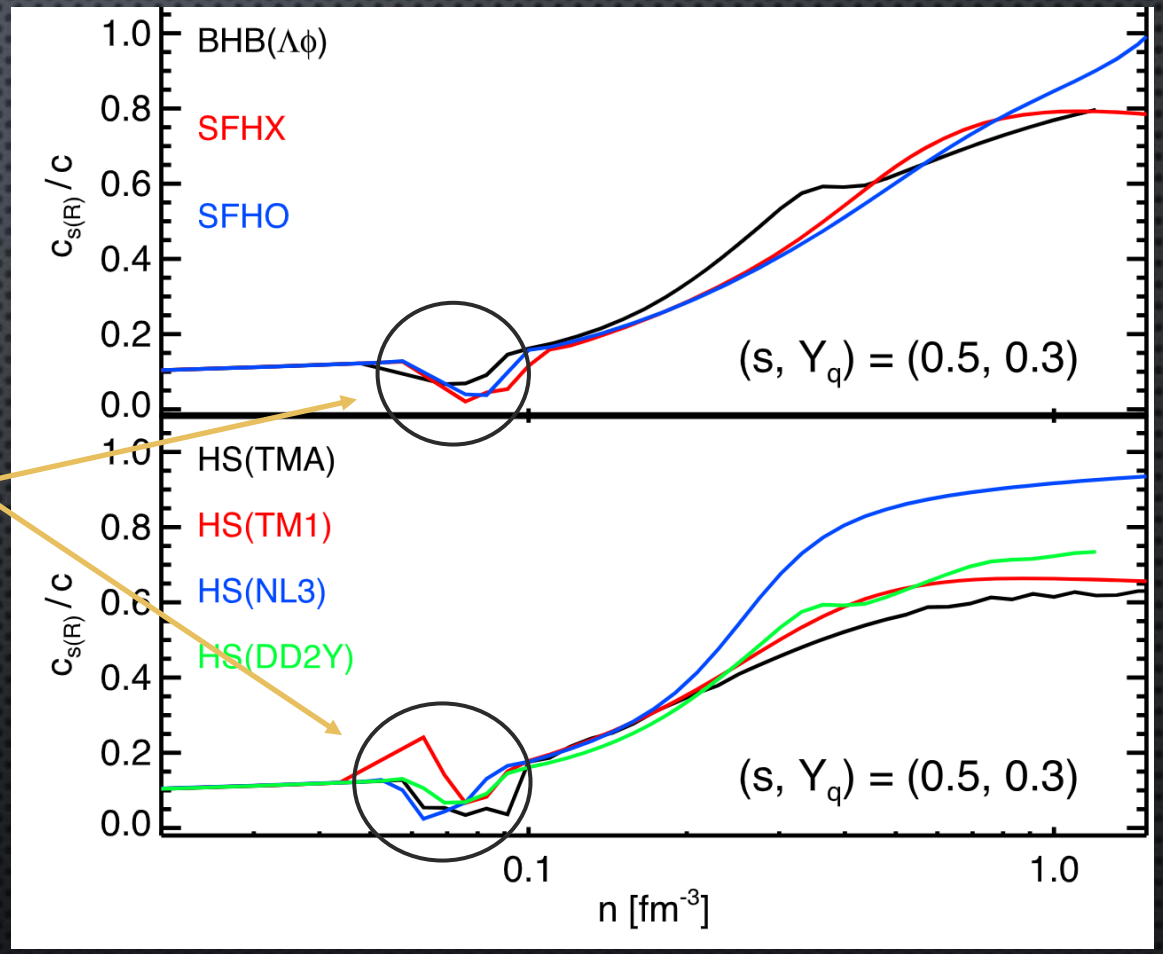
EOS: ANOMALOUS DYNAMICS IN PHASE TRANSITION

- SOUND SPEED $c_s^2 = \left.\frac{\partial P}{\partial \rho}\right|_S$

Non-Monotonic

- Phase Transition are in general **Non-Convex**

R Menikoff and B. Plohr Rev. Mod. Phys. 61, 75



M. A. Aloy et al. MNRAS 484, 4980 (2019)

EOS: CONVEXITY

FUNDAMENTAL DERIVATIVE $\mathrm{G} = 1 + \left.\frac{\partial \ln c_s^2}{\partial \ln \rho}\right|_S$

- MATERIAL IN EQUILIBRIUM (CLASSICAL FLUID) ⇒ METASTABLE STATE
- SHOCKS ⇒ LOSS OF CONVEXITY ⇒ PHASE TRANSITION

$\mathrm{G} < 0 \Rightarrow$ Non-convex

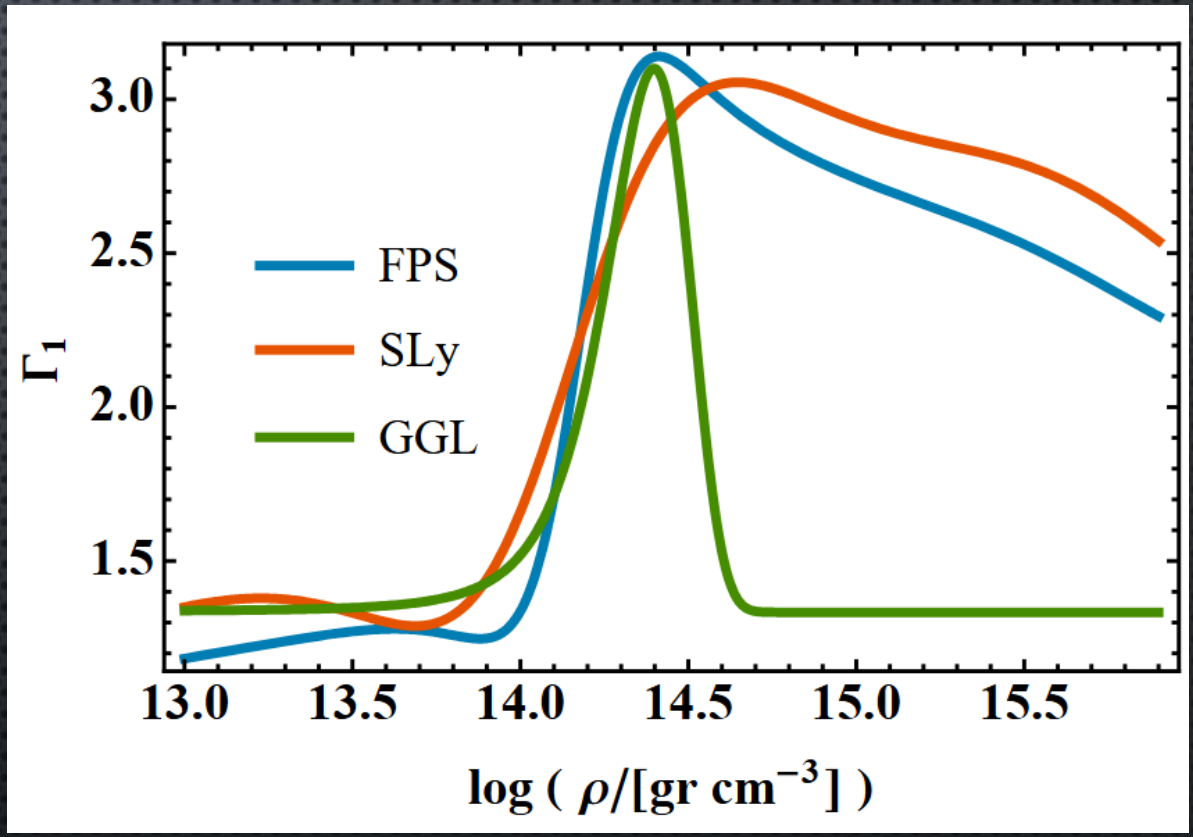
What is the contribution of Non-Convexity?

EOS: GGL MODEL

- Piecewise Polytrope:

$$P_{th} = (\Gamma - 1)\epsilon_{th} n$$

  - Typically $\Gamma = 1.8$ **constant!**
- Gaussian Gamma Law EoS:
  - $\Gamma(\rho) = \Gamma_0 + (\Gamma_1 - \Gamma_0) e^{-\frac{(\rho-\rho_1)^2}{\Sigma^2}}$
  - $\Gamma_0 = 1.8$



M. A. Aloy et al. (2018)

EOS: INITIAL DATA

EOS	M	$\mathcal{C}$	Λ	$M_{\rm ADM}$	$J_{\rm ADM}$	Ω	$\rho_{0,\rm max}$

EVOLUTION

Code for General Relativistic Hydrodynamic Simulation:

Einstein Toolkit

www.einsteintoolkit.org

→

Cold Piecewise Politrope

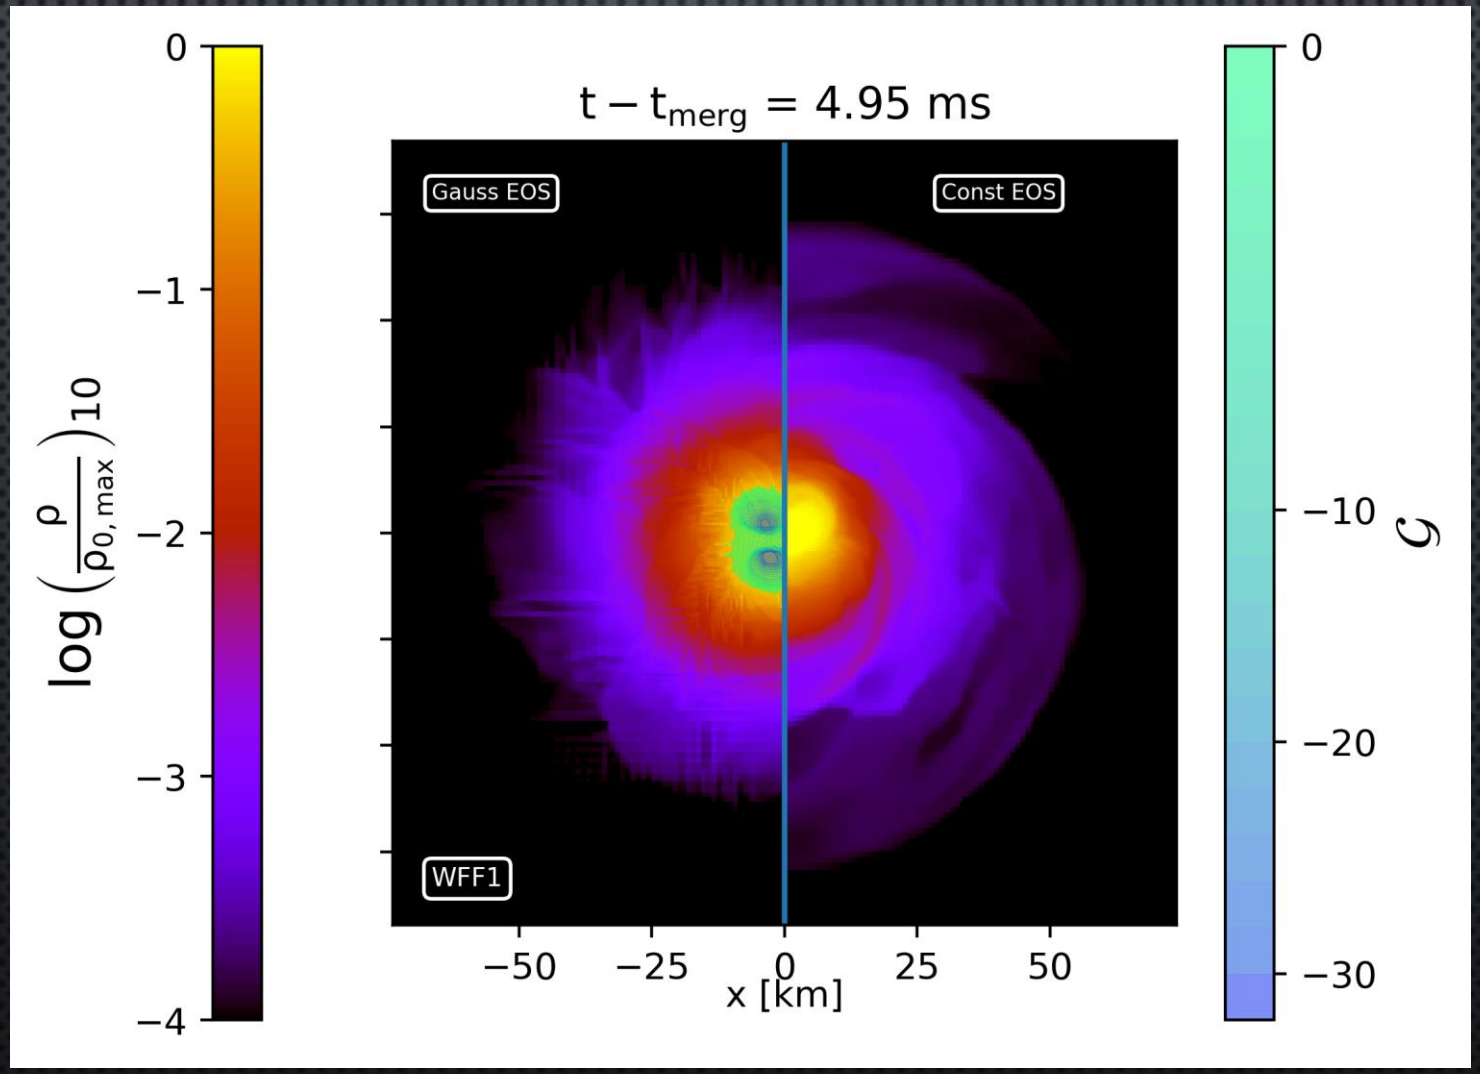
+

$$P_{th} = (\Gamma - 1)\epsilon_{th} n$$

→ $\Gamma = \text{const}$

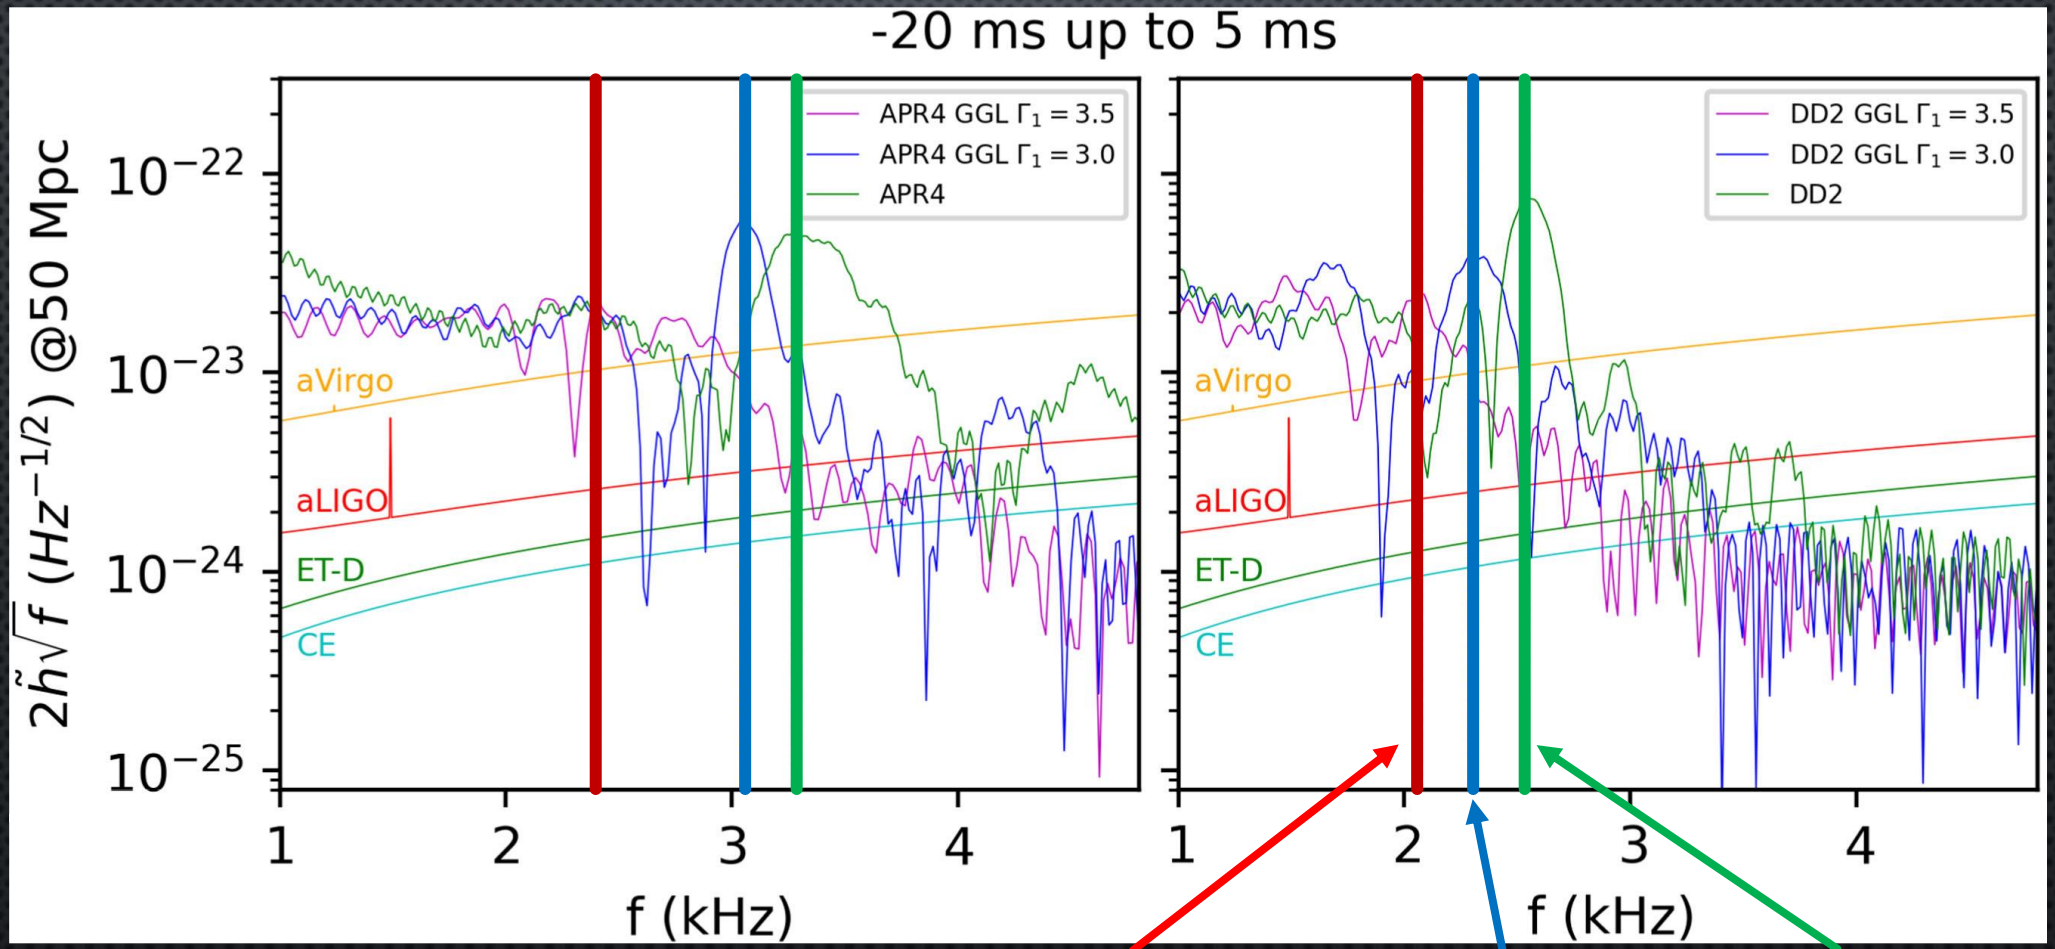
→ GGL EOS

RESULTS: NON-CONVEX CORE AND NO SPIRAL ARM



G. Rivieccio et al. (2024) Phys. Rev. D **109**, 064032

RESULTS: GENERAL SHIFT ON THE LEFT OF THE MAIN POST-MERGER PEAK IN FREQUENCY



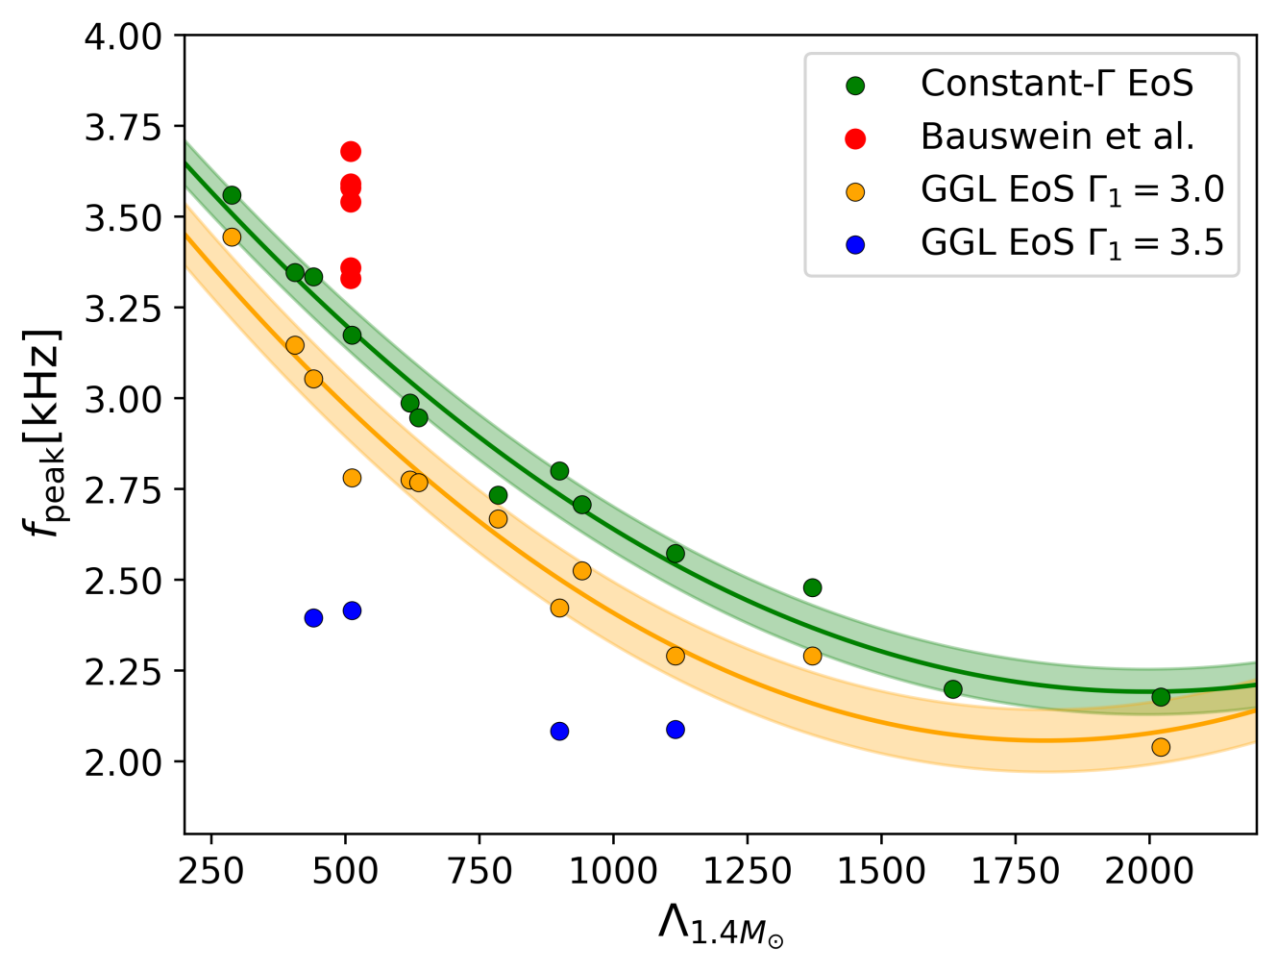
G. Rivieccio et al. (2024) Phys. Rev. D **109**, 064032

GGL $\Gamma_1 = 3.5$

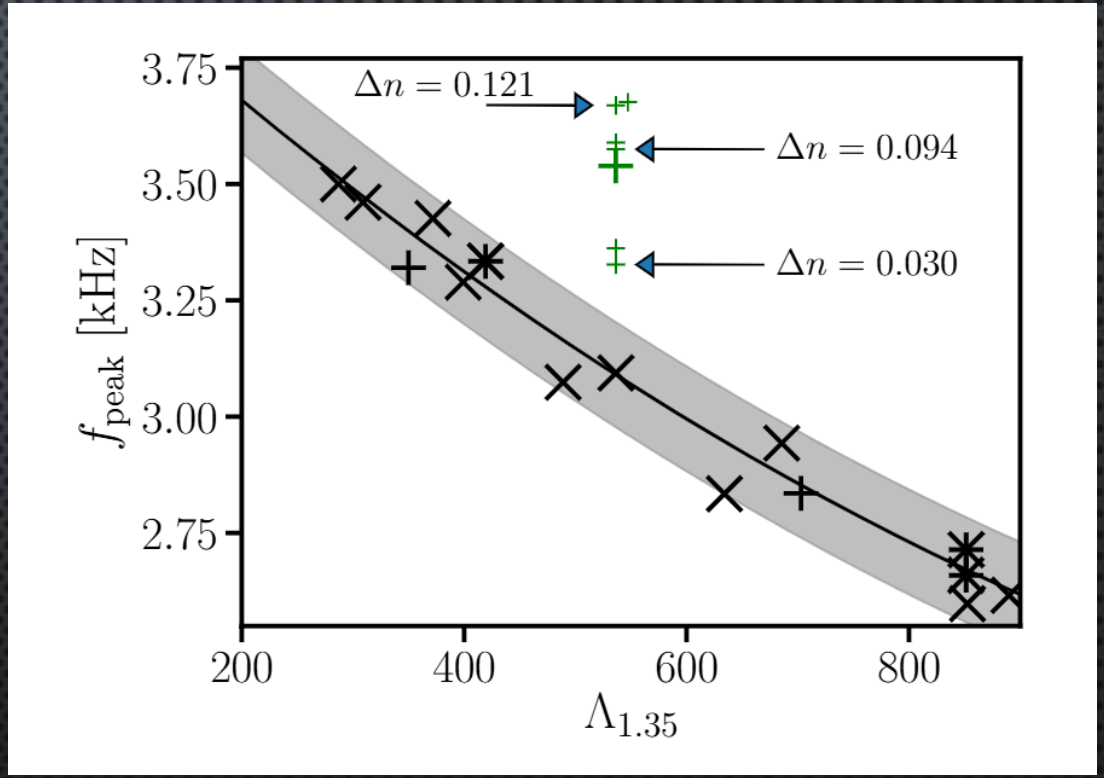
GGL $\Gamma_1 = 3.0$

STANDARD $\Gamma = 1.8$

QUASI-UNIVERSAL RELATION



G. Rivieccio et al. (2024) Phys. Rev. D **109**, 064032



Bauswein et al. 2019 Phys. Rev. Lett. **122**, 061102

Take-Home Messages

- Numerical Simulation to constrain EoS
- Non-Convexity Enhances the effect of transition
- Evaluate the Fundamental Derivative to better understand the EoS properties and observables

THANKS!
