

# **Superconducting Devices for Quantum Optics and Quantum Simulations**

**Monday 6 October 2025 - Thursday 9 October 2025**

**ECT\***

## **Scientific Programme**

The scientific program of the workshop will cover experimental and theoretical aspects of quantum optics in the microwave regime and their applications for detection and simulations. The focus will be on the exploitation of the superconducting platform for quantum optics and cQED experiments.

A detailed agenda is currently under construction. The list of invited speakers is available in the section "Speaker List".
