

ONLINE | Spin and Hydrodynamics in Relativistic Nuclear Collisions

Monday 5 October 2020 - Friday 16 October 2020

ECT* - Trento

Book of Abstracts

Contents

Experimental overview of spin polarization signatures	1
Experimental overview of spin polarization signatures	1
Vector meson spin alignment	1
Review of polarization at NICA energies	1
Review of hydrodynamic calculations of spin polarization	1
Kinetic calculations of polarization	1
Effects of hadronic interactions in Lambda polarization	1
Spin, polarization and Wigner function	2
Exact formulae for Wigner functions at equilibrium	2
Quantum features of acceleration and vorticity in relativistic hydrodynamics	2
Review of the Chiral Magnetic Effect	2
Spin and axial chemical potential	2
Holographic description of spin flow	2
Review of spin polarization in microscopic models	3
Spin diffusion in perturbative QCD	3
Spin dynamics in RTA	3
Polarization and resonance decays	3
The role of spin tensor in spin hydrodynamics	3
Entropy current analysis of spin hydrodynamics	3
Spin hydrodynamics from kinetic theory	3
Review of spin and hydrodynamics	4
Spin dynamics in equal-time kinetic theory	4
Spin hydrodynamics from effective theory	4

Spin 1 kinetic theory	4
Extreme matter in electromagnetic fields and under rotation	4
Relativistic magneto-hydrodynamics in heavy ion collisions	4
MHD from QED	5
Review of quantum kinetic theory for spin transport	5
Spin polarization from vorticity through nonlocal collisions	5
Kadanoff-Baym approach to the non-local collision term	5
Spin equilibration in kinetic approach	5
Spin transport in condensed matter physics	5
Polarization rotation of chiral fermions in vortical fluids	6
Lagrangian approach to spin hydrodynamics	6
Spin 1 kinetic theory	6
Round table discussion	6

Chair Francesco Becattini | a short opening / 2

Experimental overview of spin polarization signatures

3

Experimental overview of spin polarization signatures

Chair: Wojciech Florkowski

4

Vector meson spin alignment

Chair: Wojciech Florkowski

5

Review of polarization at NICA energies

Chair: Wojciech Florkowski

6

Review of hydrodynamic calculations of spin polarization

Chair: Jinfeng Liao

7

Kinetic calculations of polarization

Chair: Jinfeng Liao

8

Effects of hadronic interactions in Lambda polarization

Chair Jinfeng Liao

9

Spin, polarization and Wigner function

Chair: Francesco Becattini

10

Exact formulae for Wigner functions at equilibrium

Chair: Francesco Becattini

11

Quantum features of acceleration and vorticity in relativistic hydrodynamics

Chair: Francesco Becattini

12

Review of the Chiral Magnetic Effect

Chair: Dirk Rischke

13

Spin and axial chemical potential

Chair: Dirk Rischke

14

Holographic description of spin flow

Chair: Dirk Rischke

15

Review of spin polarization in microscopic models

Chair: Amaresh Jaiswal

16

Spin diffusion in perturbative QCD

Chair: Amaresh Jaiswal

17

Spin dynamics in RTA

Chair: Amaresh Jaiswal

18

Polarization and resonance decays

Chair: Amaresh Jaiswal

19

The role of spin tensor in spin hydrodynamics

Chair: Xu-Guang Huang

20

Entropy current analysis of spin hydrodynamics

Chair: Xu-Guang Huang

21

Spin hydrodynamics from kinetic theory

Chair: Xu-Guang Huang

22

Review of spin and hydrodynamics

Chair: Yuri Ivanov

23

Spin dynamics in equal-time kinetic theory

Chair: Yuri Ivanov

24

Spin hydrodynamics from effective theory

Chair: Yuri Ivanov

25

Spin 1 kinetic theory

Chair: Yuri Ivanov

26

Extreme matter in electromagnetic fields and under rotation

Chair: Ho-Ung Yee

27

Relativistic magneto-hydrodynamics in heavy ion collisions

Chair: Ho-Ung Yee

28

MHD from QED

Chair: Ho-Ung Yee

29

Review of quantum kinetic theory for spin transport

Chair: Qun Wang

30

Spin polarization from vorticity through nonlocal collisions

Chair: Qun Wang

31

Kadanoff-Baym approach to the non-local collision term

Chair: Qun Wang

32

Spin equilibration in kinetic approach

Chair: Qun Wang

33

Spin transport in condensed matter physics

Chair: Kenji Fukushima

34

Polarization rotation of chiral fermions in vortical fluids

Chair: Kenji Fukushima

35

Lagrangian approach to spin hydrodynamics

Chair: Kenji Fukushima

36

Spin 1 kinetic theory

Chair: Francesco Becattini

37

Round table discussion
